income disclosure statement

The Frequense Compensation Plan is an exciting opportunity that rewards you for selling products and services and sponsoring other participants who do the same. Although the opportunity is unlimited, individual results will vary depending on commitment levels and sales skills of each participant. Since Frequense has recently launched, it lacks enough statistical data to prepare reliable income disclosures. There will be certain participants who will earn less while others will earn much more.

We're excited about the Frequense Compensation Plan and we're confident it will provide you a solid foundation to help you achieve your financial goals. As with all endeavors, hard work and the time you dedicate impact outcomes. If income projections were presented to you prior to your enrollment, such projections are not necessarily representative of the income, if any, that you can earn through your participation in the Compensation Plan.

These income projections should not be considered as guarantees or projections of your actual earnings or profits. Success with Frequense results only from hard work, dedication, and leadership

why is frequency charged nutrition different?

The human body operates like a symphony, with each part emitting its own frequency.

When any part falls out of sync or tune, it disrupts the body's harmony.

what if your nutrition tuned your vibrations?

Within a short time I noticed I felt refreshed like a breath of fresh air. Was in better mood all day and my energy was increased. Natural energy, no jitters. I really cannot describe the taste other than smooth refreshing and good. I do not want to be a day without it. Some days I drink another one in the afternoon. One reason because I love it and if I know I am going to be extra busy I will have another one.

My husband Tom is known to be moody and very short fused, especially in the mornings. Since adding Rise and Source to his routine every morning, 20-30 minutes into drinking it he is calmer, rational, able to handle his work stresses and feels good!

This weekend they said... "Let's make a bomb moisturizer that smoothes the appearance of visible lines and also acts as a primer and then let's tune it with harmonic frequencies..."

Mind blown!

Left is first thing this morning after passing the eff out last night for 11 hours. Right is only 10 min later.

How about those forehead lines?!?!
Say nothing about my brows. I'm almost 40 and I refuse to pluck or wax them anymore. That shit hurts.
